

JustTextGiving by Vodafone: How to get up and running

Hi, I'm Sam from Vodafone. We've made donating easier, because fundraising is hard enough. The most difficult thing about raising money for charity shouldn't be asking for it.

With our JustTextGiving service, it's easy and anyone from any network can donate to your cause by sending a simple text. And they can do it for free, with every penny going to your charity.

Once you have set up your Just Giving page, you can personalise your own text code and it can all be done quickly and easily online.

Go to "Edit your page" and click on the JustTextGiving "Get started" link.

On the left hand side, a text code has already been created for you, but if you want to change it to something more personal and memorable, click the "Personalise your code" button.

Add the four characters and two numbers you want to use and you'll immediately see whether the code you've selected is available.

You can share it straight away on social media sites like Facebook and Twitter.

To find more about JustTextGiving, click the link on screen or in the video description below.
