

Vodafone Business Broadband and Phone

We've developed our own fibre optic network. So now our customers can have Broadband and Phone that's more responsive, uses the latest technology and delivers great value.

VALUE

Existing customers get even better value:

- Truly unlimited broadband – download, stream and share without the worry of usage caps
- Call management features available such as Smart Divert
- Better value for existing mobile customers

EASE

Easy switching so customers are always connected:

- One call sorts it all, we'll handle everything with their old provider* and book an engineer if required
- On switch day, customers just need to plug in their router and follow our simple set up guide for a seamless transfer

RESPONSIVE

One supplier, one bill and one number to call:

- 8-hour fix available as an optional extra
- If something goes wrong with their line they can call us and we'll make sure it's fixed within one working day with Support Plus or within 8 hours with Premier Support

EXPERIENCE

An ultra-smart app to enhance their Wi-Fi experience:

- We can boost Wi-Fi speed by prioritising one specific device
- Focus their Wi-Fi signal using beam-forming technology
- Give others access to their Wi-Fi via the Guest Wi-Fi function

Standalone Phone and Broadband offers are also available.

* With the exception of Virgin Media customers where they will be required to cancel the service directly.

Call Bundle Add Ons Anytime Landline & Mobile £6.67, Evening & Weekend £3.33, International 300 £4.17.
