

Hi I'm Sam from Vodafone's Tech Team. We've put together a short series of videos to help you register and manage your Vodafone Sure Signal.

The Sure Signal creates a 3G signal, which is ideal if you live in the countryside or a basement flat where it might be difficult to get full bars.

So, the first video explains how to set up your new Sure Signal.

Next, there's a video to show you how to register your Sure Signal online.

And then there are a few more to help you manage your Sure Signal, including adding and removing users.

For help and support with other products and services, check out the VodafoneUK YouTube Channel.
