Windows Phone 8S by HTC – how to download apps

Time	Caption
00:00:00	Hi, I'm Ben from the Vodafone Tech Team. Today I'm going to show you how to download apps via the Windows Store on your HTC 8S.
00:00:10	From the home screen, select the store icon. From here you can download apps, games and music. You can browse with a finger to check out the newest and most popular apps.
00:00:20	Or, if you know what you're looking for, simply tap the magnifying glass at the bottom. I'll download the Facebook app. So simply type in the name and your phone will now search the store for the best results, so just pick the one that you're after.
00:00:30	When you're ready, just tap install and the app will download.
00:00:40	If this is the first time you've accessed Windows Store, you'll be asked to sign in with a Microsoft Live ID. If you already use Hotmail, SkyDrive or Xbox Live, then you'll already have a Microsoft account and you can use those login details.
00:00:50	Otherwise just follow the instructions to complete set up. Once complete, you're ready to get started with your new app.
00:01:00	For more help and support on the HTC 8S and a wide variety of other devices, check out the Vodafone UK YouTube channel.
