### HTC One – How to use and personalise the HTC BlinkFeed

Time	Caption
00:00:00	Hi, I'm Ben from the Vodafone Tech Team and I'm going to show you how to use and personalise your HTC BlinkFeed on your HTC One.
00:00:10	To browse older stories, just scroll down.  To read an update, tap on it. You can get back easily by touching the home soft touch button or the arrow in the top left.
00:00:20	Your HTC BlinkFeed will show you your latest updates at the top.  Tapping the home button again, will take you back to the top.  You can sort the HTC BlinkFeed by topic, by pulling it down from the top
00:00:30	and tapping the drop down menu on the left.  To update your HTC BlinkFeed to get the very latest updates, drag the feed down and release it.
00:00:40	You can change the setting for the automatic updates by pulling down, tapping the three dots on the right and selecting 'Settings'.  Here, you can choose to only update when you have a Wi-Fi connection or use mobile data too.
00:00:50	To pick the type of stories you see in your BlinkFeed, go back to the menu on the top right and tap 'Topics and services'.
00:01:00	Here, you can select things that you're interested in. From news and blogs, apps and social networks, and topics like business, lifestyle and travel.
00:01:10	For more help and support for the HTC One or a wide range of the other devices, check out Vodafone UK's YouTube channel.
