

'Always in the know' video transcript

Hi, I'm Jamie and I'm going to show you a few great apps for keeping in touch with friends.

With BlackBerry Messenger, you can keep in constant contact with all of your friends. Adding a friend is really easy. You can do it by typing their name, their pin, or even by scanning their unique barcode.

To send a message, simply choose your friend, type your message, then press the Enter key. You can also add attachments like photos, videos, your location and much more.

Best of all, it's all done in real-time, so you'll know right away if somebody sends you a message.

With the Facebook app for Android™, you get the fantastic Facebook experience on the move. You can easily update your status, you can upload photos – either by taking a snap with the camera or picking one you've already got saved.

You can interact with your friends in all the usual ways. You can check out a post on their wall, read their info, and even check out their photos. You can also check events, friend requests, messages and lots more.
