Data... it's the lifeblood of any busy business.

It enables your people to work effectively... and it means they can connect with customers and colleagues, whenever they need to.

Vodafone Business Plus is a smoother, smarter, data sharing plan for your business.

It gives you a single pool of data to share across your teams, so everyone gets the amount they need; no more wasted data, or unexpected costs.

It's a smarter way to manage your data, allowing your business to maximise opportunities and control its spending.

With Vodafone Business Plus, you can tailor your plans so they're right for your business... and all in four easy steps.

First, all you need to do is pick from the Value or Extra plans, for all your account connections... and select the number of plans you need.

Next, simply add Traveller plans for the people in your team who do business abroad. Whether it's Europe or World Zones you travel in, we've got it covered, so you can roam worry-free.

Finally, just choose the amount of data for your business. You can buy from as little as one gig, at great value – giving you a constant flow of data to share between your people.

With unlimited UK minutes, texts and added extras like secure open Wi-Fi, non-geographic and international minutes, Business Plus understands what businesses need.

Each plan also comes with a dedicated UK-based Vodafone Prime Contact, so you can get help with your account; from setting up a new phone, billing issues or technology glitches.

And don't worry, once your plan's set up, you can still adjust it each month to fit with your changing business needs.

Vodafone Business Plus enables you to be more cost efficient, control your data and keep your people productive, when they're on the move and when they're abroad, helping you to be a Ready Business.

Vodafone Business Plus; a smoother, smarter data sharing plan for your business.
