

Acer 4820T laptop with Vodafone Wi-Fi modem

High performance laptop with an impressive 8-hour battery life, with a sleek black design. Its ultra thin and light.

High-definition graphics and plenty of processing power means you can multitask without being slowed down.

This device will support web conference with its high resolution camera
You have two ways to connect to the internet.

There is a built in slot for a Vodafone SIM card. Once the SIM card is inserted a piece of Vodafone mobile internet software which is already installed will appear on the screen. Click on the Vodafone icon on the desktop to connect to the internet.

Our Vodafone Wi-Fi modem also comes with the laptop. The Vodafone Wi-Fi modem is the latest cable free, without software, wireless modem that connects any laptop, PC, Mac or tablet (as long as it is Wi-Fi enabled) to the Internet. It can connect 5 devices at once and works in the UK and overseas.

The modem lets out a 'Wi-Fi' signal which you can connect to using the password on the inside of the modem. The Acer laptop with Vodafone Wi-Fi modem is available at Vodafone. The price of the laptop and modem will depend on which business package you choose and agreement length. All the prices shown are excluding VAT.
