

Imperial College
London

Every

someone in the UK is
diagnosed with **cancer**

A PC running
24-hours a day
would take...

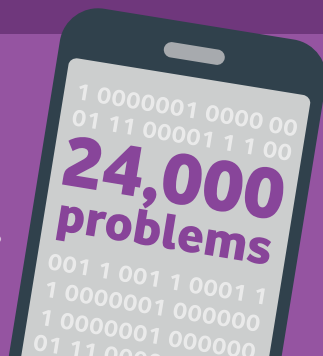

...to process the
data required.

100,000 smartphones
running **6 hours a night**
could do the job in...

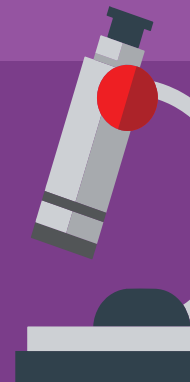

A smartphone
can solve up to...

in 6 hours

Project DRUGS analyses billions
of combinations of existing
cancer drugs to potentially
improve their effectiveness
